Look Ahead America Confirms Illegal Voter Registrations in AZ & PA

Washington, DC – Look Ahead America’s (LAA) Research Group recently verified illegal voter registrations in both Arizona and Pennsylvania that cast ballots in the 2020 General Election.

Ian Camacho, Look Ahead America’s Director of Research, made the following statement:

This unique type of illegal registration – registered at P.O. Boxes and similar locations not allowed by law – totaled almost 1,700 across two swing states. This was just one of six tranches of illegal ballots; we are still working on identifying illegal ballots in the additional five tranches. Further, this search was not exhaustive since we could not check other nonresidential types of locations due to limited resources. Nevertheless, I am proud of the work our team has done.

LAA had submitted these finds to State Attorney General Mark Brnovich’s office after Look Ahead Arizona (LAAZ) held its election integrity rally in December 2021 but never heard back, despite Brnovich’s claims of being tough on crime and working to improve election integrity. By bringing attention to these finds, LAA intends to bring public pressure to get him to finally do something about this issue.
