Pennsylvania Improves Voter Data Transparency Following LAA Report

Washington, DC – After Look Ahead America identified important missing information in Pennsylvania’s voter data platform, the state’s Office of Administration agreed to make an update to remedy the problem.

The email acknowledging the change from Pennsylvania can be found here:
https://lookaheadamerica.org/ballot_question/

Ian Camacho, LAA’s Director of Research, made the following statement:

This small but simple win shows that anybody can improve election integrity and transparency by contacting their local and state level officials politely and with a clear focused outcome in mind.

We have followed up for full clarity on which Mail Application Types qualify as overseas military and civilian ballot types to get further transparency. We will update our Pennsylvania Report accordingly with this new information as it comes in to make a more accurate assessment of the data and numbers.

Read the full details of LAA’s Pennsylvania Report which identified the missing information here:
