LAA Report Documents How 2020 Election was Rigged by Zuckerberg, Democrats

Washington, DC—Today, Look Ahead America released "Rigged: How Zuckerberg and the Left Bought an Election," an expansive report documenting how a leftist cabal used millions in tax-deductible funds to shape the outcome of the 2020 General Election.

LAA's Executive Director Matt Braynard made the following statement:

> This analysis reveals a severe and determinative bias in the private investments in the country's election system run by a team of hard-left Democrats and funded by an oligarch who was not content with merely censoring conservative voices but spent over $100 million to disenfranchise conservative voters.

> We are optimistic that this report will lead to state-level legislation that will prevent this from ever happening again. Many states have already made progress on this front but we have a long way to go.

From the report:

> Without exception, Democrat counties were awarded larger grants and received their funds earlier.

> Grants to Pennsylvania counties that Trump won averaged $0.57 per capita and $3.11 per capita in counties Biden won. CTCL grants to counties in Texas that Trump won averaged $0.55 per capita and $3.22 per capita in counties Biden won (of the $33.5 million in discovered grants). CTCL grants to counties in North Carolina that Trump won averaged $0.73 per capita and $1.46 per capita in counties Biden won (of the $5.4 million in discovered grants). CTCL grants to counties in Georgia that Trump won averaged $4.28 per capita and $5.06 per capita in counties Biden won (of the $27.8 million in discovered grants). CTCL grants to counties in Arizona that Trump won averaged $1.29 per capita and $5.83 per capita in counties Biden won (of the $27.8 million in discovered grants).

The report may be found at https://www.lookaheadamerica.org/rigged.
